# Golla Poorna Charan Gopal

B.Tech in Computer Science & Engineering

**Roll No:** 2506004
**Phone:** +91 7993430559
**Email:** gollag.ug25.cs@nitp.ac.in

## PROFESSIONAL SUMMARY

Detail-oriented Computer Science and Engineering undergraduate at the National Institute of Technology, Patna. Possesses a strong academic foundation, demonstrated by a 9.6 CGPA, alongside practical skills in C++, Data Structures & Algorithms (DSA), and Modern Web Development. Proven problem-solver with over 190+ challenges resolved on LeetCode and practical experience building responsive, dynamic web interfaces.

## EDUCATION

**National Institute of Technology, Patna** *2025 — 2029 (Expected)*

Bachelor of Technology (B.Tech) in Computer Science & Engineering

Current CGPA: 9.6/10 (1st Semester)

**Narayana Junior College, Bramhadevam, Nellore** *2023 — 2025*

State Board of Andhra Pradesh (Class XII)

Aggregate Percentage: 96.9%

**Narayana Olympiad School, Nellore** *2022 — 2023*

State Board of Andhra Pradesh (Class X)

Aggregate Percentage: 92%

## TECHNICAL SKILLS

| | |
|---|---|
| **Languages:** | C, C++, Java, JavaScript |
| **Web Technologies:** | HTML5, CSS3, AJAX, JSON, XML |
| **Core Concepts:** | Object-Oriented Programming (OOP), Asynchronous JavaScript, Data Structures & Algorithms (DSA) |
| **Developer Tools:** | Visual Studio Code, GitHub, Git, Code::Blocks |
| **Areas of Interest:** | Full-Stack Web Development, Algorithmic Problem Solving |

## PROJECTS

**Dynamic Search Suggestion Engine (AJAX, XML & JSON)**

- Engineered a highly responsive, dynamic search suggestion module utilizing vanilla JavaScript and asynchronous API calls (AJAX).
- Developed separate structured parsers for XML and JSON data layers to filter and render real-time results instantly.
- Designed an intuitive UI with interactive states, supporting elegant hover feedback and click selection to optimize user navigation.

### JavaScript Sorting and Searching Visualizer

- Developed an interactive frontend simulation module to visualize sorting and searching algorithm behaviors in real-time.
- Leveraged modern JavaScript DOM manipulation techniques to dynamically update, transitions, and display algorithm steps.

### Console-Based ATM Management System (C++)

- Architected a robust console-based ATM simulator applying core Object-Oriented Programming (OOP) methodologies in C++.
- Implemented secured workflow modules for PIN verification, multi-account balance inquiry, deposit transactions, and withdrawal limits.

### Music Platform Frontend Module

- Designed and constructed the layout design of a responsive music player portal utilizing HTML5, CSS3, and JavaScript.
- Focused on implementing highly interactive UI controls, media structure, and fluid navigation paths.

## CERTIFICATIONS

**C++ Programming Certification** — BodhiTree, IIT Bombay. Shortlisted for the prestigious internship interview process in Mumbai.

## ACHIEVEMENTS

**DSA Problem Solving:** Successfully solved over 190+ conceptual algorithmic challenges on LeetCode platform, focusing heavily on advanced Data Structures and Algorithms.
