Golla Poorna Charan Gopal

B.Tech Undergraduate in Computer Science & Engineering

Roll Number: 2506004

Phone: +91 7993430559
Email: gollag.ug25.cs@nitp.ac.in
Location: Patna, India

PROFESSIONAL SUMMARY

Highly motivated Computer Science and Engineering undergraduate student at the National Institute of Technology, Patna, maintaining an outstanding academic record (9.6 CGPA). Possesses strong foundational knowledge of core computer science principles, with key focus areas in Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), and interactive web technologies. Proven ability in designing clean backend modules, interactive frontends, and dynamic asynchronous components. Eager to contribute technical skills and engineering concepts to collaborative development projects and internships.

EDUCATION

National Institute of Technology, Patna — **2025 — 2029**
Bachelor of Technology (B.Tech) in Computer Science & Engineering — CGPA: 9.6 (1st Sem)

Narayana Junior College, Bramhadevam, Nellore — **2023 — 2025**
Intermediate (State Board of Andhra Pradesh) — Percentage: 96.9%

Narayana Olympiad School, Nellore — **2022 — 2023**
Secondary Education (State Board of Andhra Pradesh) — Percentage: 92.0%

TECHNICAL SKILLS & INTERESTS

Languages: C, C++, Java, JavaScript

Web Technologies: HTML5, CSS3, AJAX, JSON, XML

Core Concepts: Object-Oriented Programming (OOP), Asynchronous JS, Data Structures & Algorithms (DSA)

Developer Tools: VS Code, Code::Blocks, Git, GitHub, simpleCode Blocks

Areas of Interest: Full-Stack Web Development, Software Engineering, Algorithmic Problem Solving

PROJECTS

Dynamic Search Suggestion Engine

JavaScript, AJAX, XML, JSON

- Engineered a dynamic, highly responsive search auto-completion and suggestion interface powered by asynchronous requests.
- Created dual parsing pipelines to seamlessly process both structured XML and JSON data payloads in real time.
- Designed a user-focused UI utilizing CSS and advanced DOM manipulation to handle hover triggers, mouse selection, and fluid feedback transitions.

ATM Management System

C++, Object-Oriented Programming

- Developed a fully functional console-based banking terminal simulator leveraging fundamental OOP principles such as encapsulation, data abstraction, and inheritance.
- Programmed secure runtime modules to manage critical system operations including PIN verification, instant deposit/withdrawal processing, and balance lookup logic.

JavaScript Sorting & Searching Module

JavaScript, HTML5, CSS3

- Built an interactive, algorithm-visualizing module enabling users to dynamically inspect search query iterations and sorting runs.
- Leveraged standard-compliant DOM manipulation structures to ensure fast runtime UI paint updates during real-time data filtering.

Music Platform Frontend Module

HTML5, CSS3, JavaScript

- Designed and built a modern, responsive frontend module for a music streaming service.
- Emphasized semantic markup and cross-device visual alignment to deliver an intuitive interface.

CERTIFICATIONS

- **C++ Programming Certification** – BodhiTree, IIT Bombay (Selected for high-performance student Internship Interview at IIT Bombay, Mumbai).

ACHIEVEMENTS

- **LeetCode:** Solved over 190+ data structures and algorithmic challenge problems, reinforcing systematic problem-solving skills.
