GOLLA POORNA CHARAN GOPAL

Patna, Bihar • +91 7993430559 • gollag.ug25.cs@nitp.ac.in

PROFESSIONAL SUMMARY

Highly motivated Computer Science & Engineering undergraduate at the National Institute of Technology Patna with a strong academic foundation, holding a 9.6 CGPA. Possesses robust algorithmic and analytical problem-solving capabilities, demonstrated by solving over 190 LeetCode problems and securing a C++ Programming Certification from IIT Bombay. Skilled in C++, JavaScript, Object-Oriented Programming (OOP), and frontend web development.

EDUCATION

National Institute of Technology Patna **2025 – 2029**
Bachelor of Technology in Computer Science & Engineering *CGPA: 9.6 / 10.0 (1st Semester)*

Narayana Junior College **2023 – 2025**
State Board of Andhra Pradesh (Class XII) — Bramhadevam, Nellore *Percentage: 96.9%*

Narayana Olympiad School **2022 – 2023**
State Board of Andhra Pradesh (Class X) — Nellore *Percentage: 92.0%*

TECHNICAL SKILLS

Languages:	C, C++, Java, JavaScript (ES6+)
Web Technologies:	HTML5, CSS3, AJAX, JSON, XML, DOM Manipulation
Core Concepts:	Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Asynchronous JavaScript
Developer Tools:	Git, GitHub, Visual Studio Code, Code::Blocks

PROJECTS

Dynamic Search Suggestion System **JavaScript, AJAX, XML, JSON**
Real-time asynchronous search interface

- Engineered an interactive search suggestion feature utilizing JavaScript and asynchronous AJAX queries to parse both XML and JSON datasets.
- Optimized system responsiveness to dynamically render filtered search results with real-time UI hover states and click-selection options.

ATM Management System **C++**
Console-based banking simulator utilizing Object-Oriented Programming

- Designed and developed a functional console ATM application applying core Object-Oriented Programming principles including encapsulation and inheritance.
- Implemented secure, modular flows for essential transactions: PIN validation, balance inquiries, deposit logging, and withdrawal constraints.

JavaScript Sorting and Searching Module **JavaScript, HTML, DOM**
Interactive algorithmic web interface

- Built a frontend web interface demonstrating real-time visualization of searching and sorting algorithms.
- Leveraged efficient DOM manipulation techniques to continuously update array configurations and state transitions on screen.

Music Website Frontend Module **HTML, CSS, JavaScript**
Web frontend application

- Developed a responsive, modern user interface for a music streaming platform using clean, semantically structured CSS and dynamic HTML layouts.

CERTIFICATIONS

C++ Programming Certification: Certified by BodhiTree, IIT Bombay. Selected for an internship interview in Mumbai based on academic evaluation.

ACHIEVEMENTS

Competitive Programming: Solved over 190 high-quality Data Structures and Algorithms questions on LeetCode.
