Golla Poorna Charan Gopal

Bachelor of Technology in Computer Science & Engineering

National Institute of Technology, Patna • Roll No: 2506004

+91 7993430559

gollag.ug25.cs@nitp.ac.in

PROFESSIONAL SUMMARY

Highly motivated Computer Science & Engineering undergraduate at NIT Patna with a strong academic foundation (**9.6 CGPA**) and excellent analytical problem-solving skills. Proficient in C++, Java, and modern web development technologies. Experienced in building interactive front-end user interfaces and designing modular, object-oriented system simulations. Proven technical aptitude with over **190+ data structures and algorithms problems solved** on LeetCode.

EDUCATION

National Institute of Technology, Patna — **2025 — 2029**

B.Tech in Computer Science & Engineering — CGPA: 9.6 / 10 (1st Semester)

Narayana Junior College — **2023 — 2025**

State Board of Andhra Pradesh (Class XII) • Nellore, AP — Percentage: 96.9%

Narayana Olympiad School — **2022 — 2023**

State Board of Andhra Pradesh (Class X) • Nellore, AP — Percentage: 92%

TECHNICAL SKILLS

Languages:	C, C++, Java, JavaScript (ES6+)
Web Technologies:	HTML5, CSS3, AJAX, JSON, XML, DOM Manipulation
Core Concepts:	Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Asynchronous JavaScript
Developer Tools:	Visual Studio Code, GitHub, Code::Blocks

PROJECTS

Dynamic Search Suggestion Engine — **JavaScript & AJAX**

Real-time dynamic query filtration module

- Engineered an interactive, real-time search suggestion module designed to deliver high-performance, filtered results based on user queries.
- Parsed dynamic XML and JSON datasets on the client side, translating raw data structures into fast, accessible recommendations.
- Designed a fully responsive, user-friendly UI utilizing event-driven DOM updates, custom keyboard hover states, and seamless mouse click selection flows.

ATM Management System — **C++ & OOP**

Console-based banking transaction simulator

- Developed a robust console-based banking application simulating real-world automated teller machine interactions and transactions.
- Applied comprehensive Object-Oriented Programming (OOP) principles in C++ to structure secure model user accounts, operations, and transaction states.

- Engineered dependable, secure validation logical flows for secure PIN verification, real-time balance inquiries, account deposits, and cash withdrawals.

JavaScript Sorting & Searching Visualizer **JavaScript, HTML & CSS**

Interactive algorithmic visual simulator

- Built an algorithmic sorting and searching simulation tool designed to visually educate and demonstrate core computing principles to users.
- Developed dynamic rendering algorithms using direct DOM manipulation to visually represent active data states during sorting and searching execution phases.

Music Website Frontend Module **HTML, CSS & JavaScript**

Responsive media player interface

- Designed and built a clean, fully responsive, interactive frontend user interface for a modern music streaming website.
- Utilized semantic HTML5 and structured CSS3 styling to implement layout styling and provide a modern, highly interactive visual player platform.

CERTIFICATIONS & ACHIEVEMENTS

C++ Programming Certification: Issued by BodhiTree, IIT Bombay. Shortlisted for the prestigious winter/summer internship interview process in Mumbai based on exceptional course evaluation performance.

Competitive Programming: Successfully solved 190+ comprehensive data structures and algorithms problems on LeetCode to continuously refine logical reasoning and execution efficiency.
