Golla Poorna Charan Gopal

Bachelor of Technology in Computer Science & Engineering

+91 7993430559 gollag.ug25.cs@nitp.ac.in Roll No: 2506004 NIT Patna, Bihar, India

PROFESSIONAL SUMMARY

Highly analytical and motivated Computer Science & Engineering undergraduate at NIT Patna with an exceptional academic foundation (9.6 CGPA). Proficient in high-level programming languages, including C++ and Java, combined with hands-on experience in modern web technologies. Proven problem solver with over 190+ algorithmic challenges successfully solved on LeetCode. Passionate about building robust systems, interactive frontends, and object-oriented architectures.

EDUCATION

National Institute of Technology, Patna — CGPA: 9.6 / 10 (1st Semester)
B.Tech in Computer Science & Engineering — 2025 — 2029

Narayana Junior College — Percentage: 96.9%
State Board of Andhra Pradesh (Class XII) | Nellore, AP — 2023 — 2025

Narayana Olympiad School — Percentage: 92%
State Board of Andhra Pradesh (Class X) | Nellore, AP — 2022 — 2023

TECHNICAL SKILLS

Languages:	C, C++, Java, JavaScript (ES6+)
Web Technologies:	HTML5, CSS3, AJAX, JSON, XML, DOM Manipulation
Core Concepts:	Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Asynchronous JavaScript
Developer Tools:	Visual Studio Code, GitHub, Code::Blocks

ACADEMIC & PERSONAL PROJECTS

Dynamic Search Suggestion Engine — JavaScript, AJAX, XML & JSON

- Engineered an interactive, real-time query recommendation module designed to deliver ultra-fast, client-side filtered search results.
- Implemented asynchronous parser pipelines to transform raw XML and JSON datasets into dynamic visual query recommendations instantly.
- Designed a responsive and highly accessible UI featuring keyboard hover selections, active states, and streamlined DOM operations.

ATM Management System — C++ & OOP Principles

- Developed a secure, console-based banking terminal simulation to model real-world automated teller machine interactions.
- Applied comprehensive object-oriented design principles, encapsulating user profile data, session logs, and transaction states.
- Engineered secure state verification systems handling PIN checks, deposits, cash withdrawals, and live balance computations.

JavaScript Sorting & Searching Visualizer — JavaScript, HTML5 & CSS3

- Built an educational algorithmic visualizer intended to step-through core searching and sorting sequences dynamically.

- Utilized responsive DOM manipulation methodologies to display color-coded, real-time comparisons of active sorting frames.

Music Website Frontend Module

HTML5, CSS3 & JavaScript

- Designed and constructed a fully responsive user interface for a modern audio streaming application layout.
- Leveraged clean semantic HTML structures alongside modern CSS properties to establish interactive playback interfaces.

CERTIFICATIONS & ACHIEVEMENTS

C++ Programming Certification (Issued by BodhiTree, IIT Bombay)

Demonstrated high course proficiency and successfully secured shortlist eligibility for prestigious winter/summer internship interview streams in Mumbai based on performance metrics.

Competitive Programming (LeetCode)

Successfully solved over 190+ data structures and algorithms problems to continuously refine logical reasoning, complexity optimization, and system efficiency parameters.
