GOLLA POORNA CHARAN GOPAL

Patna, Bihar | +91 7993430559 | gollag.ug25.cs@nitp.ac.in

PROFESSIONAL SUMMARY

Dedicated Computer Science & Engineering undergraduate at the National Institute of Technology Patna with a strong academic foundation (9.6 CGPA in 1st semester). Skilled in C++, JavaScript, Object-Oriented Programming, and Data Structures & Algorithms. Demonstrates strong problem-solving capabilities with 190+ LeetCode problems solved and C++ certification from IIT Bombay.

EDUCATION

National Institute of Technology Patna **2025 – 2029**
Bachelor of Technology in Computer Science & Engineering *CGPA: 9.6 / 10.0 (1st Sem)*

Narayana Junior College, Bramhadevam, Nellore **2023 – 2025**
State Board of Andhra Pradesh (Class XII) *Percentage: 96.9%*

Narayana Olympiad School, Nellore **2022 – 2023**
State Board of Andhra Pradesh (Class X) *Percentage: 92.0%*

TECHNICAL SKILLS

Languages:	C, C++, Java, JavaScript
Web Technologies:	HTML, CSS, AJAX, JSON, XML
Core Concepts:	Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Asynchronous JavaScript, DOM Manipulation
Developer Tools:	Visual Studio Code, Code::Blocks, GitHub
Areas of Interest:	Web Development, Algorithmic Problem Solving in C++, Data Structures & Algorithms

PROJECTS

ATM Management System **C++**
Console-based simulation utilizing Object-Oriented Programming

- Engineered a functional ATM simulator using core Object-Oriented Programming concepts in C++.
- Implemented key banking operations including PIN verification, balance inquiry, deposit, and cash withdrawal.

Dynamic Search Suggestion System **JavaScript, AJAX, XML, JSON**
Real-time asynchronous search interface

- Built an interactive search suggestion feature utilizing JavaScript and AJAX to query and process both XML and JSON datasets.
- Rendered real-time filtered results dynamically, featuring an interactive UI with click selection and hover feedback.

JavaScript Sorting and Searching Module **JavaScript, HTML, DOM**
Interactive algorithmic web interface

- Implemented dynamic searching and sorting functionality in JavaScript.
- Updated displayed results interactively in real time through efficient DOM manipulation.

Music Website Frontend Module **HTML, CSS, JavaScript**

Web frontend application

- Designed and developed a clean user interface frontend module for a music streaming platform using standard web technologies.

CERTIFICATIONS

- **C++ Programming Certification:** Certified by BodhiTree, IIT Bombay; selected for an internship interview in Mumbai.

ACHIEVEMENTS

- **Competitive Programming:** Solved 190+ Data Structures and Algorithms problems on LeetCode.
